## Introduction

Write an ExpressJS web application that queries and updates a MySQL database and a Mongo database.

The MySQL database is called [proj2024mysql](#) and can be downloaded from the *Project* section of Moodle for this module (*proj2024Mysql.sql*).

## MySQL Database

The [proj2024mysql](#) database consists of 3 tables:

student	
Column Name	Details
<a href="#">sid</a>	Student ID
<a href="#">name</a>	Student Name
<a href="#">age</a>	Student Age

module	
Column Name	Details
<a href="#">mid</a>	Module ID
<a href="#">name</a>	Module Name
<a href="#">credits</a>	Module Credits
<a href="#">lecturer</a>	The ID of the lecturer for this module

grade	
Column Name	Details
<a href="#">sid</a>	Student ID
<a href="#">mid</a>	Module ID
<a href="#">grade</a>	The Student's grade in this module

Full details of the Primary and Foreign Keys as well as datatypes can be found in the database itself.

Import *proj2024Mysql.sql* into MySQL to setup the initial database.

## Mongo Database

The Mongo database can be downloaded from the *Project* section of Moodle for this module (*proj2024MongoDB.json*).

The Mongo database name must be **proj2024MongoDB**, and the collection containing the documents must be called **lecturers**.

The file *proj2024MongoDB.json* contains:

```
{ "_id": "L001", "name": "Mark Collins", "did": "ART" }
{ "_id": "L002", "name": "Barbara O'Toole", "did": "ART" }
{ "_id": "L003", "name": "Paddy McDonagh", "did": "CIV" }
{ "_id": "L004", "name": "Josie Sullivan", "did": "COM" }
{ "_id": "L005", "name": "Tommy Hyde", "did": "COM" }
{ "_id": "L006", "name": "Anne Mulligan", "did": "ENG" }
{ "_id": "L007", "name": "Arthur McNamee", "did": "ENG" }
{ "_id": "L008", "name": "Fiona Murphy", "did": "MAT" }
{ "_id": "L009", "name": "John Armstrong", "did": "MAT" }
{ "_id": "L010", "name": "Cathal O'Donovan", "did": "MEC" }
{ "_id": "L011", "name": "Fergus McMathuna", "did": "SOC" }
```

Import *proj2024MongoDB.json* into MongoDB to setup the initial database as follows:

```
mongoimport.exe --db=proj2024MongoDB --collection=lecturers --
file="<path proj2024MongoDB.json>"
```

## Marks

This assignment is worth 50% of the marks for the module.

90% of the marks for this assignment will be for implementing the functionality in this document.

10% of the marks for this assignment will be for innovation, extra functionality, exceeding the requirements listed in this document.

**Any innovation etc. must be clearly indicated in a file called *Innovation.pdf* stored in the root folder of your application.**

**NOTE:** Students may be invited to an MS Teams meeting for a [viva](#) explanation of any or all parts of their submission.

Plagiarism will be dealt with in accordance with the university's [Student Code](#).

## Submission of the Project

The zipped project (named GXXXXXXX.zip where GXXXXXXX is your student number) should be uploaded to the *Project* section of Moodle no later than **Tuesday, January 6<sup>th</sup>, 2025 at 9:00am.**

**You must have a file entitled *GitLocation.pdf* in the root folder of your application which contains a link to the GIT repository you used when developing your project.**

## Overview of Web App

The web app must run on port 3004, and handle the following HTTP routes and methods:

### *GET* /(*Home Page*)

The Home page consists of 3 links:

- One to the *Students* page
- One to the *Grades* page
- One to the *Lecturers* (MongoDB) page

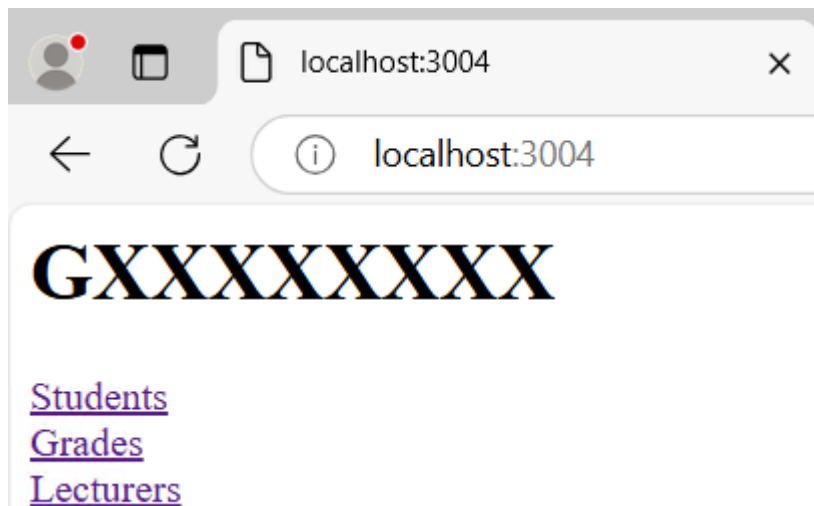

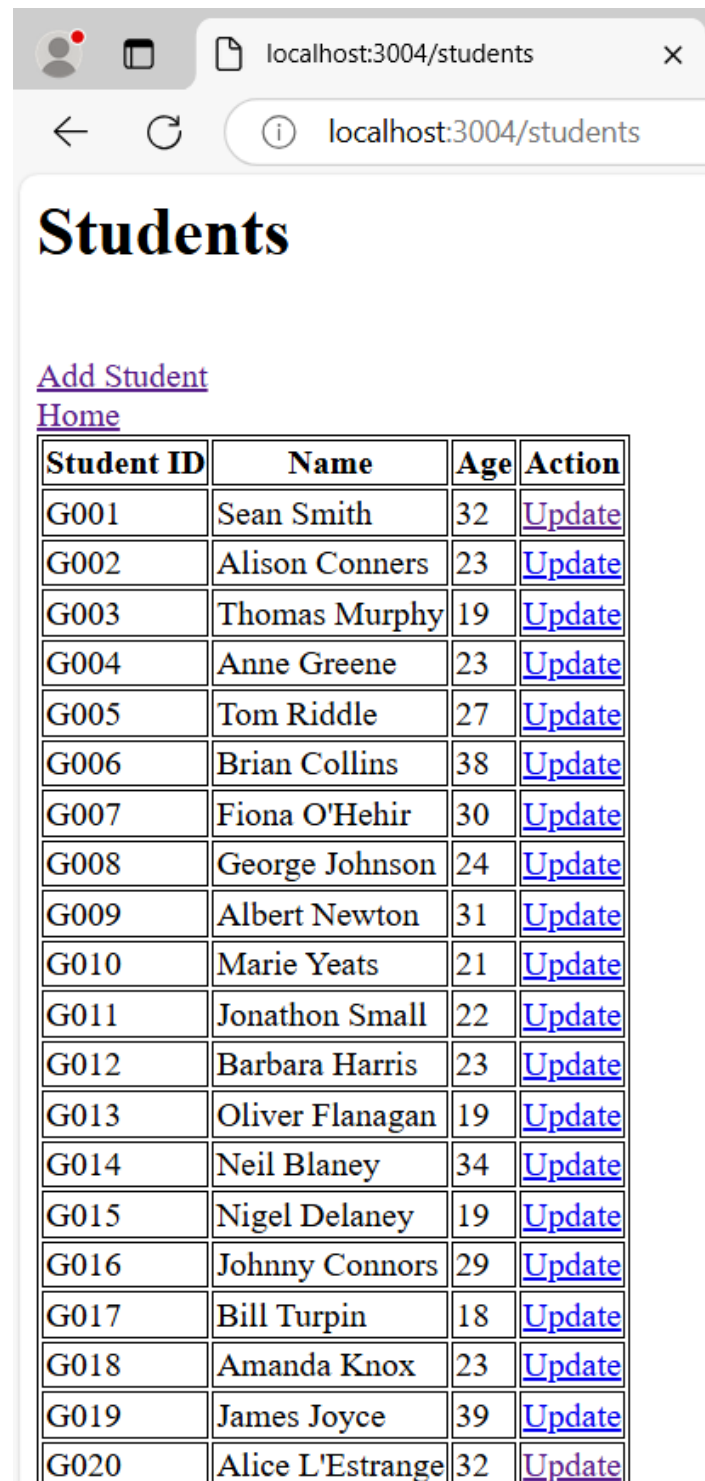

Figure 1 Main Page

### *GET /students (Students Page)*

The *Students* page:

- Shows details of all Students.
- Has an *Update* link for each Student.
- Has an *Add Student* link.
- Has a link to the *Home* page.

The *Students Page* should show data in alphabetical order by student ID.

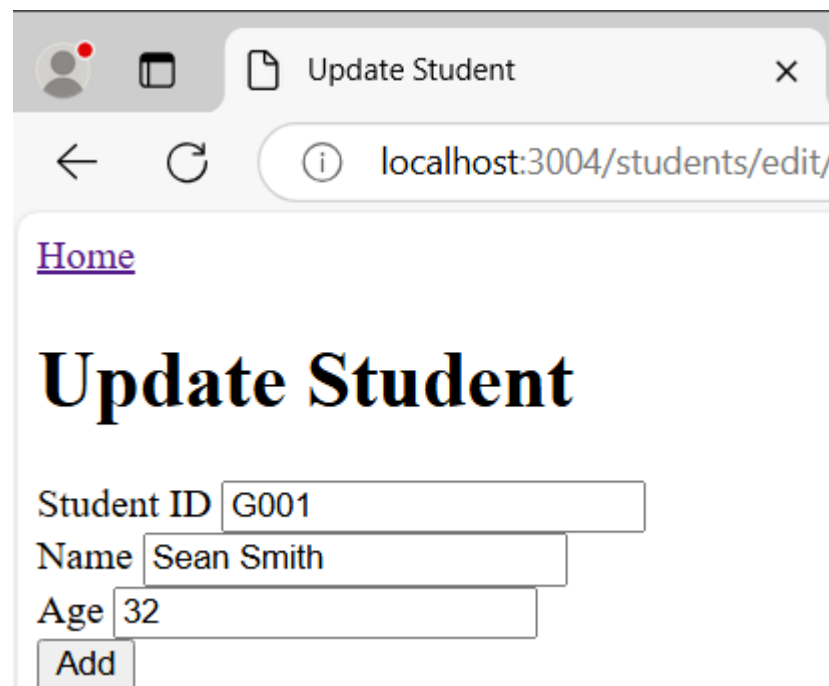

Student ID	Name	Age	Action
G001	Sean Smith	32	<a href="#">Update</a>
G002	Alison Conners	23	<a href="#">Update</a>
G003	Thomas Murphy	19	<a href="#">Update</a>
G004	Anne Greene	23	<a href="#">Update</a>
G005	Tom Riddle	27	<a href="#">Update</a>
G006	Brian Collins	38	<a href="#">Update</a>
G007	Fiona O'Hehir	30	<a href="#">Update</a>
G008	George Johnson	24	<a href="#">Update</a>
G009	Albert Newton	31	<a href="#">Update</a>
G010	Marie Yeats	21	<a href="#">Update</a>
G011	Jonathon Small	22	<a href="#">Update</a>
G012	Barbara Harris	23	<a href="#">Update</a>
G013	Oliver Flanagan	19	<a href="#">Update</a>
G014	Neil Blaney	34	<a href="#">Update</a>
G015	Nigel Delaney	19	<a href="#">Update</a>
G016	Johnny Connors	29	<a href="#">Update</a>
G017	Bill Turpin	18	<a href="#">Update</a>
G018	Amanda Knox	23	<a href="#">Update</a>
G019	James Joyce	39	<a href="#">Update</a>
G020	Alice L'Estrange	32	<a href="#">Update</a>

Figure 2 *Students Page*

***GET /students/edit/:sid, POST /students/edit/:sid (Update Student Page)***

When the *Update* link is clicked beside a student, a GET request is sent to `/students/edit/:sid` and the student's details are shown.

Home

# Update Student

Student ID

Name

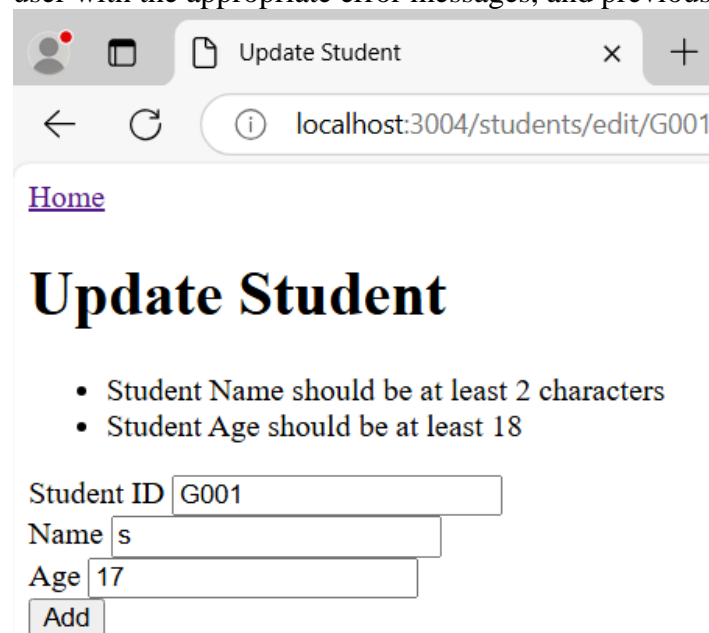

Age

Add

*Figure 3 Update Student Page*

- Student ID is not editable.
- Name should be a minimum of 2 characters.
- Age should be 18 or older.

If incorrect information is entered, the *Update Student* page should be returned to the user with the appropriate error messages, and previous data entered.

Home

# Update Student

- Student Name should be at least 2 characters
- Student Age should be at least 18

Student ID

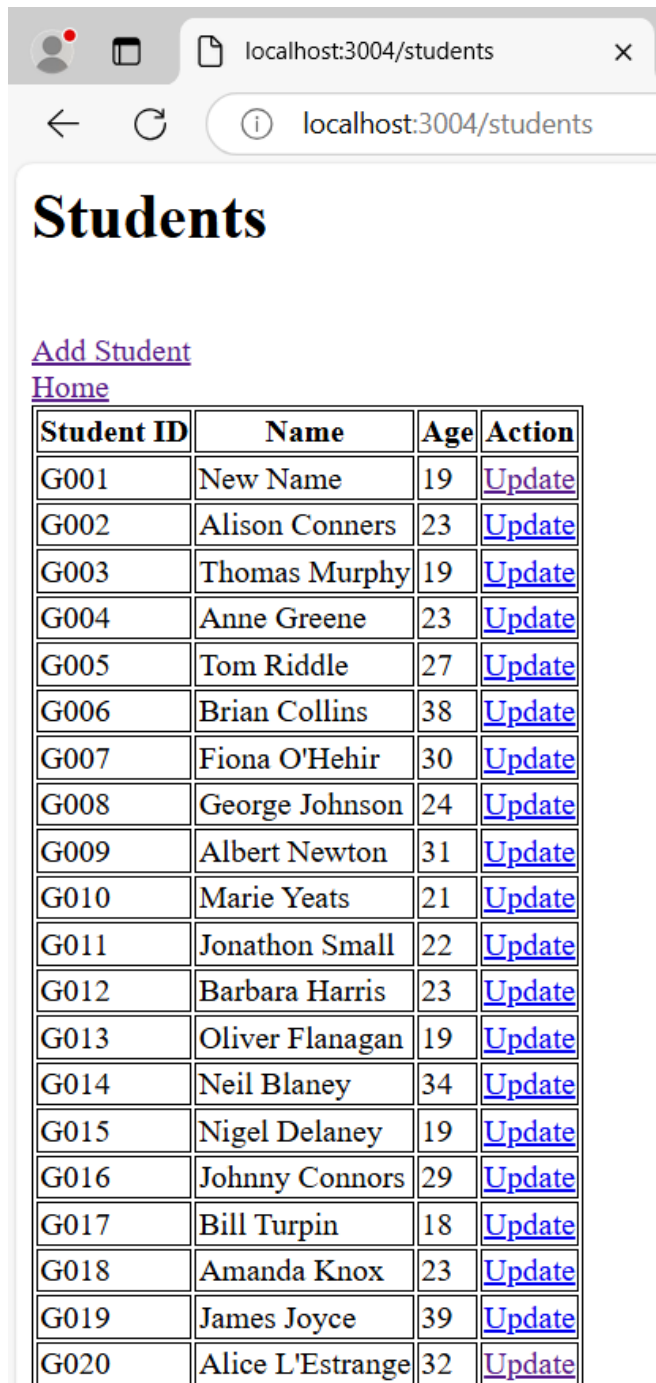

Name

Age

Add

*Figure 4 Update Student Page with Errors*

When a Student has been successfully updated in the MySQL database, the user is returned to the *Students Page*.

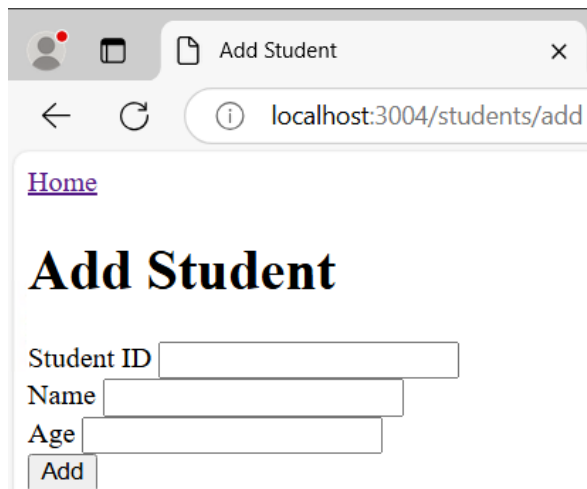

Student ID	Name	Age	Action
G001	New Name	19	<a href="#">Update</a>
G002	Alison Connors	23	<a href="#">Update</a>
G003	Thomas Murphy	19	<a href="#">Update</a>
G004	Anne Greene	23	<a href="#">Update</a>
G005	Tom Riddle	27	<a href="#">Update</a>
G006	Brian Collins	38	<a href="#">Update</a>
G007	Fiona O'Hehir	30	<a href="#">Update</a>
G008	George Johnson	24	<a href="#">Update</a>
G009	Albert Newton	31	<a href="#">Update</a>
G010	Marie Yeats	21	<a href="#">Update</a>
G011	Jonathon Small	22	<a href="#">Update</a>
G012	Barbara Harris	23	<a href="#">Update</a>
G013	Oliver Flanagan	19	<a href="#">Update</a>
G014	Neil Blaney	34	<a href="#">Update</a>
G015	Nigel Delaney	19	<a href="#">Update</a>
G016	Johnny Connors	29	<a href="#">Update</a>
G017	Bill Turpin	18	<a href="#">Update</a>
G018	Amanda Knox	23	<a href="#">Update</a>
G019	James Joyce	39	<a href="#">Update</a>
G020	Alice L'Estrange	32	<a href="#">Update</a>

Figure 5 Student successfully updated.

### *GET /students/add, POST /students/add (Add Student Page)*

When the *Add Student* link is clicked on the *Student Page*, a GET request is sent to `/students/add` the following form returned:

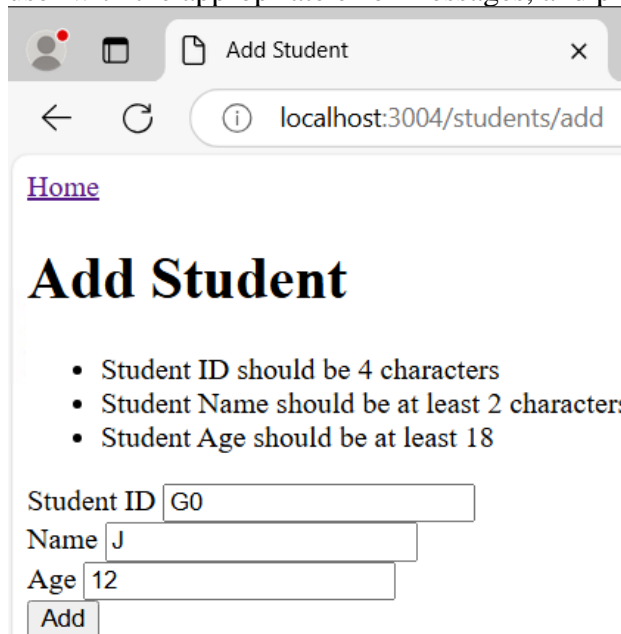

The screenshot shows a web browser window with the title 'Add Student'. The address bar displays 'localhost:3004/students/add'. Below the address bar is a navigation bar with a 'Home' link. The main heading is 'Add Student'. The form contains three input fields: 'Student ID', 'Name', and 'Age'. Below these fields is an 'Add' button.

Figure 6 Add Student Page

- Student ID is 4 characters.
- Name should be a minimum of 2 characters.
- Age should be 18 or older.

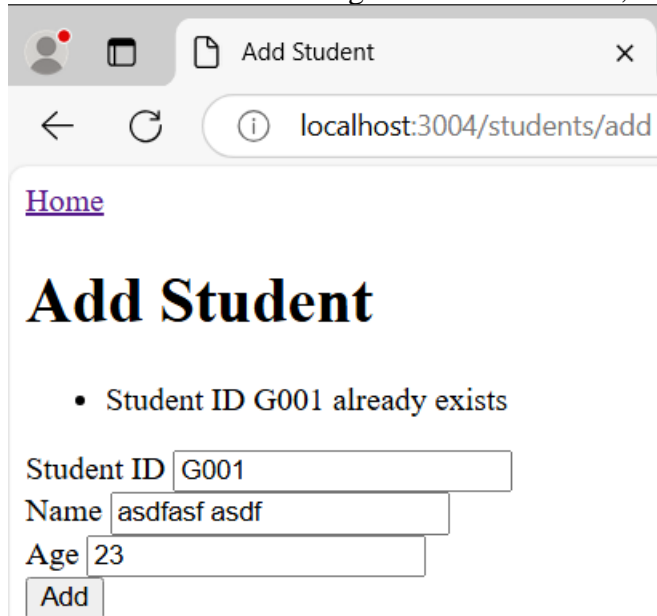

If incorrect information is entered, the *ADD Student* page should be returned to the user with the appropriate error messages, and previous data entered.

The screenshot shows the same 'Add Student' form as in Figure 6, but with error messages. The error messages are listed above the input fields: 'Student ID should be 4 characters', 'Student Name should be at least 2 characters', and 'Student Age should be at least 18'. The input fields contain the following values: 'Student ID' is 'G0', 'Name' is 'J', and 'Age' is '12'. The 'Add' button is still present.

Figure 7 Add Student Page with Errors

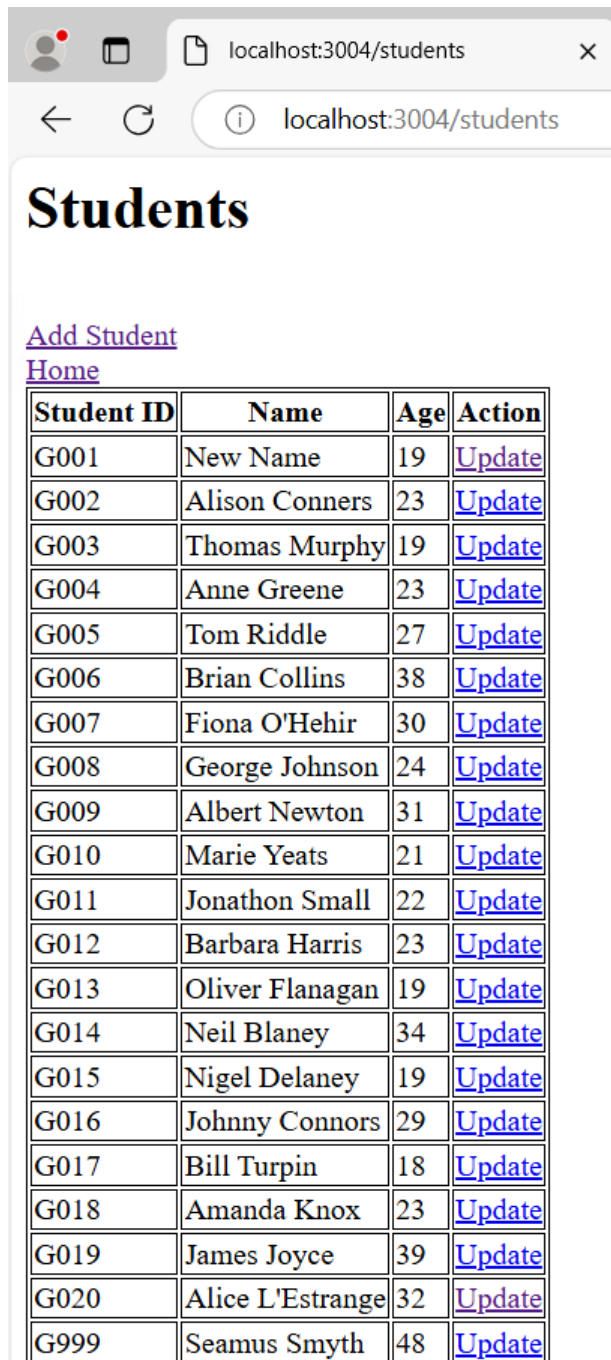

If a student with an existing student ID is added, an error message should be shown:

The screenshot shows a web browser window with a single tab titled 'Add Student'. The address bar displays 'localhost:3004/students/add'. The page content includes a link for 'Home', a main heading 'Add Student', and a bulleted error message: '• Student ID G001 already exists'. Below the message is a form with three input fields: 'Student ID' containing 'G001', 'Name' containing 'asdfasf asdf', and 'Age' containing '23'. An 'Add' button is positioned at the bottom of the form.

*Figure 8 Student with ID G001 already exists*

When a Student has been successfully added to the MySQL database, the user is returned to the *Students Page*.

Student ID	Name	Age	Action
G001	New Name	19	<a href="#">Update</a>
G002	Alison Conners	23	<a href="#">Update</a>
G003	Thomas Murphy	19	<a href="#">Update</a>
G004	Anne Greene	23	<a href="#">Update</a>
G005	Tom Riddle	27	<a href="#">Update</a>
G006	Brian Collins	38	<a href="#">Update</a>
G007	Fiona O'Hehir	30	<a href="#">Update</a>
G008	George Johnson	24	<a href="#">Update</a>
G009	Albert Newton	31	<a href="#">Update</a>
G010	Marie Yeats	21	<a href="#">Update</a>
G011	Jonathon Small	22	<a href="#">Update</a>
G012	Barbara Harris	23	<a href="#">Update</a>
G013	Oliver Flanagan	19	<a href="#">Update</a>
G014	Neil Blaney	34	<a href="#">Update</a>
G015	Nigel Delaney	19	<a href="#">Update</a>
G016	Johnny Connors	29	<a href="#">Update</a>
G017	Bill Turpin	18	<a href="#">Update</a>
G018	Amanda Knox	23	<a href="#">Update</a>
G019	James Joyce	39	<a href="#">Update</a>
G020	Alice L'Estrange	32	<a href="#">Update</a>
G999	Seamus Smyth	48	<a href="#">Update</a>

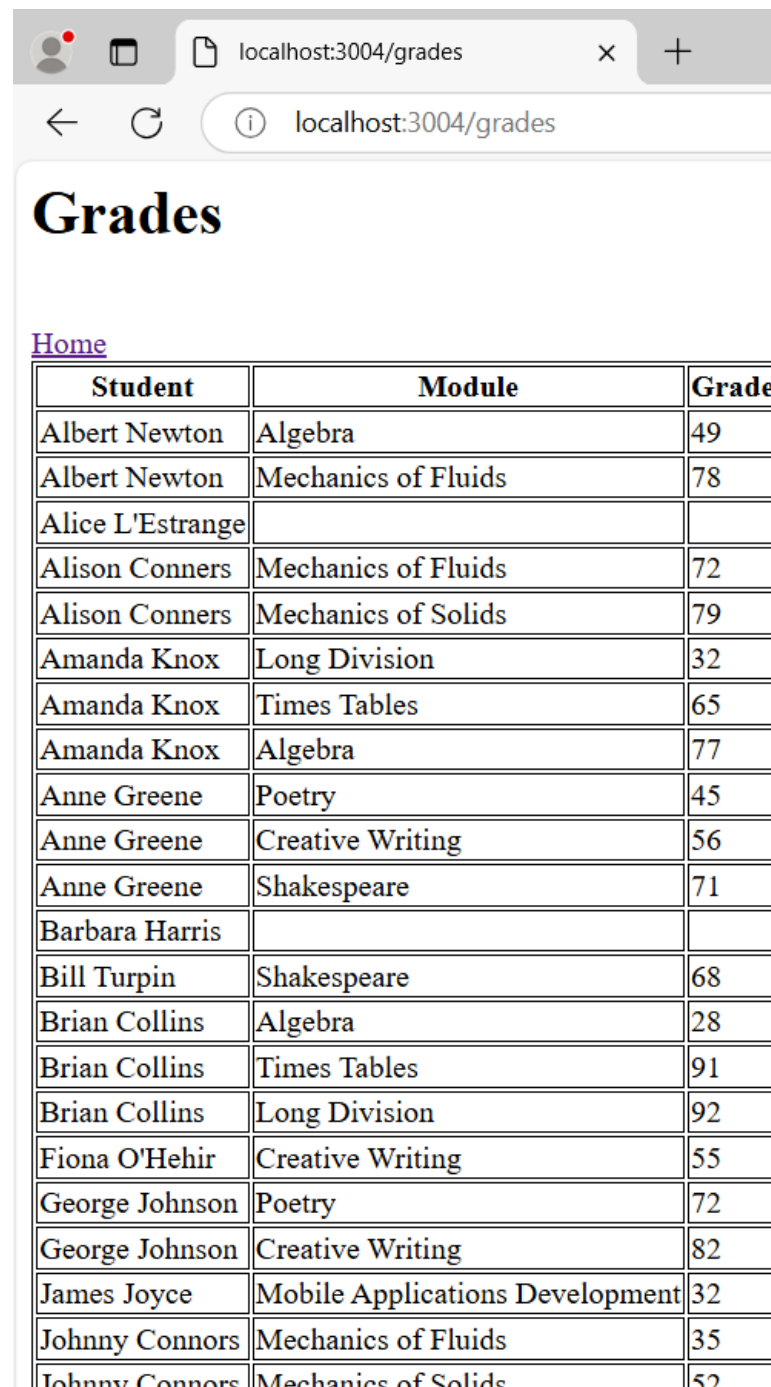

Figure 9 List of Students with newly added Student

### *GET /grades (Grades Page)*

The *Grades* page:

- Shows each Student's *name*.
- Shows the name of each Module studied by a Student.
- Shows the grade received in each Module by a Student.
- If a student isn't studying any Module, then just the Student name should be shown.
- Has a link to the *Home* page.

The *Grades Page* should show data in alphabetical order by student name, and within that in grade order from lowest to highest.

Student	Module	Grade
Albert Newton	Algebra	49
Albert Newton	Mechanics of Fluids	78
Alice L'Estrange		
Alison Connors	Mechanics of Fluids	72
Alison Connors	Mechanics of Solids	79
Amanda Knox	Long Division	32
Amanda Knox	Times Tables	65
Amanda Knox	Algebra	77
Anne Greene	Poetry	45
Anne Greene	Creative Writing	56
Anne Greene	Shakespeare	71
Barbara Harris		
Bill Turpin	Shakespeare	68
Brian Collins	Algebra	28
Brian Collins	Times Tables	91
Brian Collins	Long Division	92
Fiona O'Hehir	Creative Writing	55
George Johnson	Poetry	72
George Johnson	Creative Writing	82
James Joyce	Mobile Applications Development	32
Johnny Connors	Mechanics of Fluids	35
Johnny Connors	Mechanics of Solids	57

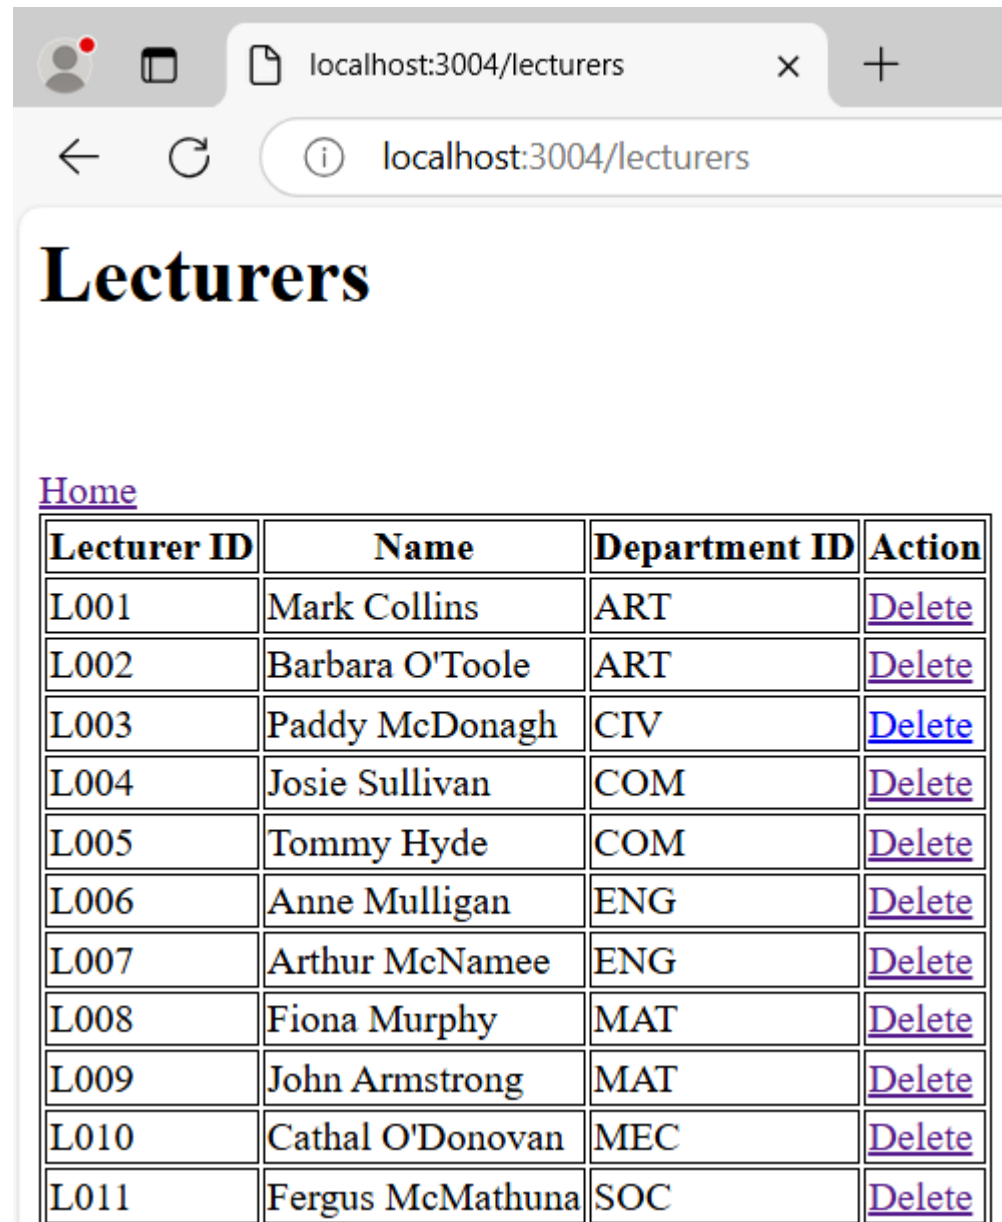

Figure 10 Grades Page

### *GET /lecturers (Lecturers (MongoDB) Page)*

The *Lecturers* (MongoDB) page:

- Shows details of all Lecturers (from MongoDB).
- Has a *Delete* link for each Lecturer.
- Has a link back to the *Main* page.

The *Lecturers Page* should show data in alphabetical order by lecturer ID.

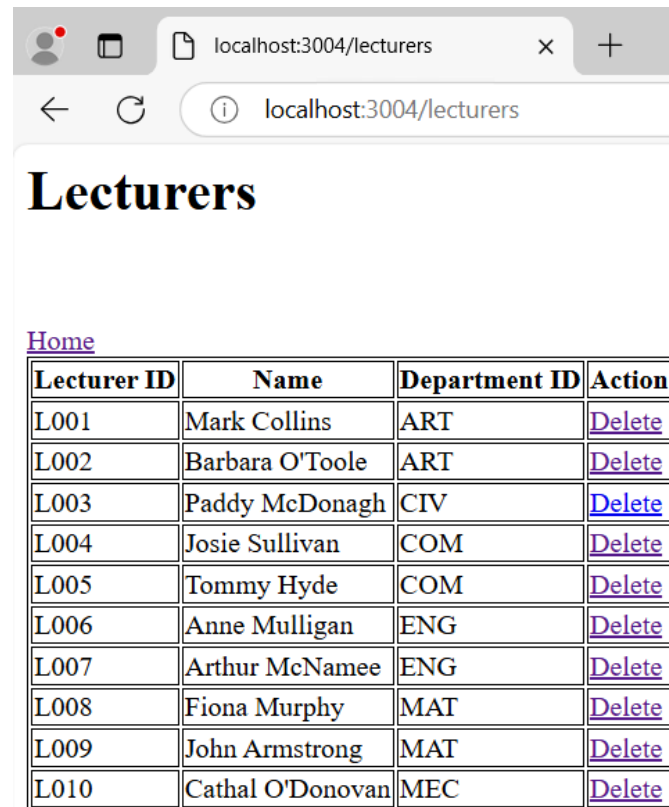

Lecturer ID	Name	Department ID	Action
L001	Mark Collins	ART	<a href="#">Delete</a>
L002	Barbara O'Toole	ART	<a href="#">Delete</a>
L003	Paddy McDonagh	CIV	<a href="#">Delete</a>
L004	Josie Sullivan	COM	<a href="#">Delete</a>
L005	Tommy Hyde	COM	<a href="#">Delete</a>
L006	Anne Mulligan	ENG	<a href="#">Delete</a>
L007	Arthur McNamee	ENG	<a href="#">Delete</a>
L008	Fiona Murphy	MAT	<a href="#">Delete</a>
L009	John Armstrong	MAT	<a href="#">Delete</a>
L010	Cathal O'Donovan	MEC	<a href="#">Delete</a>
L011	Fergus McMathuna	SOC	<a href="#">Delete</a>

Figure 11 *Lecturers (MongoDB)*

### *GET /lecturers/delete/:lid*

When the *Delete* link is clicked beside a lecturer, a GET request is sent to `/lecturers/delete/:lid`.

If the lecturer does not teach any modules, then he/she can be deleted from MongoDB, and the user returned to *Lecturers Page*.

Lecturer ID	Name	Department ID	Action
L001	Mark Collins	ART	<a href="#">Delete</a>
L002	Barbara O'Toole	ART	<a href="#">Delete</a>
L003	Paddy McDonagh	CIV	<a href="#">Delete</a>
L004	Josie Sullivan	COM	<a href="#">Delete</a>
L005	Tommy Hyde	COM	<a href="#">Delete</a>
L006	Anne Mulligan	ENG	<a href="#">Delete</a>
L007	Arthur McNamee	ENG	<a href="#">Delete</a>
L008	Fiona Murphy	MAT	<a href="#">Delete</a>
L009	John Armstrong	MAT	<a href="#">Delete</a>
L010	Cathal O'Donovan	MEC	<a href="#">Delete</a>

Figure 12 List of Lecturers after L011 has successfully been deleted

If the lecturer does teach a module, then an error message should be returned to the user, and the lecturer should not be deleted from MongoDB.

Figure 13 Cannot delete Lecturer L001 from MongoDB as he/she has associated modules.
